

Prevent the Spread of Germs

Because of the increased risk of flu and respiratory illness this time of year, we ask that you take precautions to prevent the spread of germs.

Due to the severity of this year's flu and respiratory illness season and for the protection of our clients and staff, we are currently a no handshake zone. Please do not be alarmed if our doctors and staff do not greet you with a handshake.

If you prefer to wait in the car instead of in the waiting room, please let a front desk member know. We can take down your information and give you a call when we are ready to see you.

We will not be accepting personal belongings for patients that are being admitted into the hospital.
